

# Dazzle Beach ●●●●●

Difficulty: Advanced

You will need:

The **CEIVA Dazzle Crystal Kit** (available at [ceiva.com/store](http://ceiva.com/store))

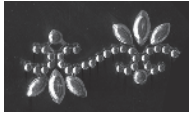

The **black** faceplate from your CEIVALife, CEIVA Pro 80 or CEIVA 8-inch Digital Photo Frame

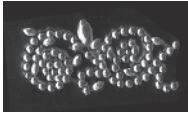

A pair of scissors

## Directions:

1. Remove black faceplate from CEIVA frame
2. Remove crystal strips from plastic backing.
3. Look for the two strips with petal formations. Create a small strip of two petal formations by counting three crystals from the tip of the petals. Snip carefully between the 3<sup>rd</sup> and 4<sup>th</sup> crystal on either side. Cut six strips in this way. 
4. Snip off the petals on each strip to form a wave shape. 

5. Look for the two strips with curling vine formations. Create a small strip of two curl formations as shown. Cut four strips in this way. 

6. **Loosely** place 3 wave strips and 2 curl strips along the left side of the faceplate, starting about an inch from the top of the inner frame of the faceplate. Start with a wave strip and alternate between them as shown. Do the same on the right, aligning them to give the illusion of a continuous wave across the frame.

*(instructions continued on second page)*

# Dazzle Beach ●●●●●

Difficulty: Advanced

You will need:

The **CEIVA Dazzle Crystal Kit** (available at [ceiva.com/store](http://ceiva.com/store))

The **black** faceplate from your CEIVALife, CEIVA Pro 80 or CEIVA 8-inch Digital Photo Frame

A pair of scissors

## Directions (continued):

7. Arrange four petal formations in the top corner in a circular shape to form a sun.

8. From the remainder of the petal shape, snip away the petal formation and large circular crystal to form a bird shape. Place in upper left corner of frame.

9. From the remaining swirl crystal strips, snip individual crystals away and scatter along the bottom of the frame to form the sand. Use different sizes to make a more interesting array.

10. When placement of all elements is finalized, press all crystals firmly into place.

11. Replace black faceplate onto CEIVA frame.
